

# MARBLE CARE *GUIDE*

## Marble and Granite Cleaning and Maintenance Guide

Thank you for your recent purchase at Vanity by Design.

It is important that you care for your marble tops, to keep them in the best condition possible. Marble is a natural stone which needs careful maintenance as marble is porous. The porous nature of stone means that stone is susceptible to staining by certain substances (toothpaste) and it absorbs moisture. ***IT MUST BE CLEANED WITH A PH NEUTRAL CLEANER ONLY.***

Never use abrasive cleaning agents as this will damage the stone and remove the sealant, used to waterproof the marble. This could then lead to staining and the shiny surface becoming dull and scratched.

We advice not to use acidic products such as vinegar, lemon juice or other cleaners containing acidic on marble, including bleach on our marble bench top. ***This will not be covered under our warranty policy.***

Your marble/granite top can be sealed upon installation. These are available from a reputable stone care merchants. **We recommend that you contact 'The Marble Man'** who can assist with any advice needed in regards to your bench top. [www.themarbleman.com.au](http://www.themarbleman.com.au)
